COMPANY OVERVIEW

Company Name: Primeavo Limited

Headquarters: 4th Floor, Office No. 411,
NHC Building, Samora Avenue,
Dar es Salaam, Tanzania

Primary Agricultural Operations:
Njombe Region, Tanzania

Core Scope of Work:

Large-scale commercial farming and cultivation of Hass and Fuerte avocado varieties.

Industrial Processing and bulk distribution of high-grade crude avocado oil.

Business Model:

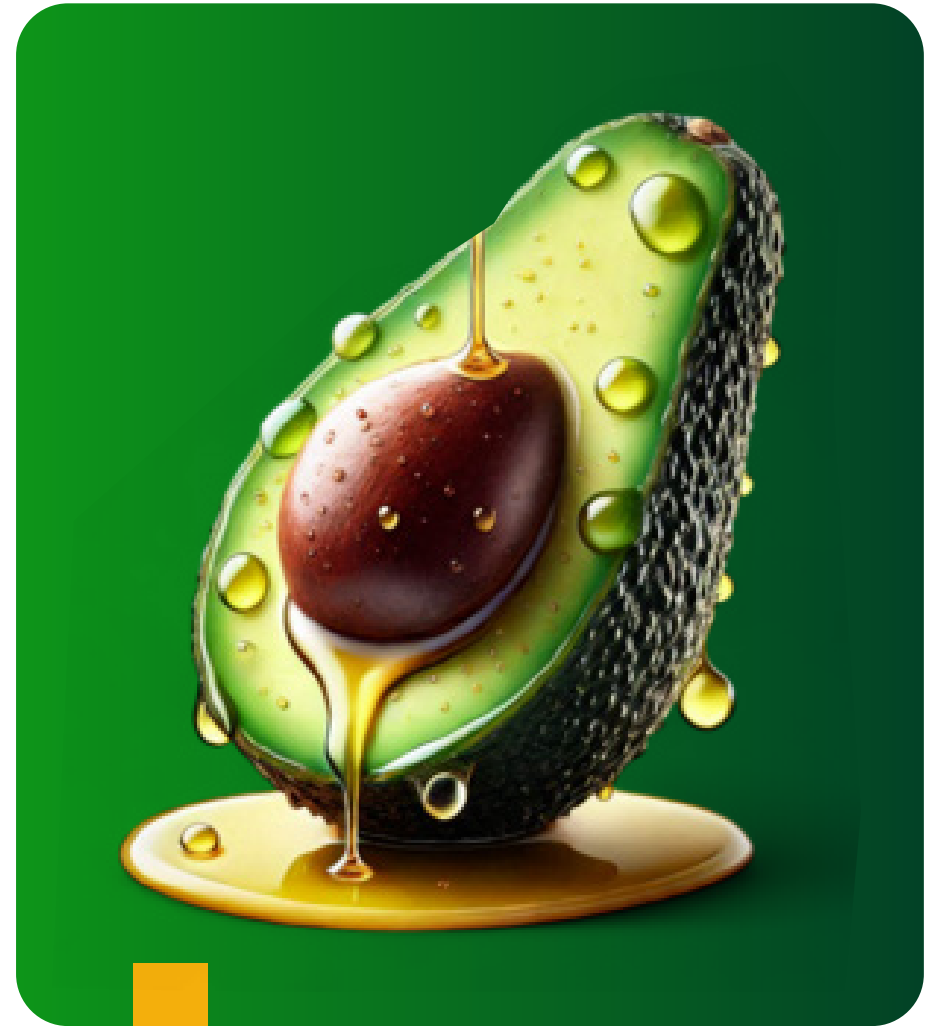

Fully integrated farm-to-factory production optimized for domestic supply and international bulk export markets.

EXECUTIVE SUMMARY

PRIMEAVO LIMITED is a premier, vertically integrated agro-processing enterprise operating at the intersection of sustainable agriculture and industrial Processing. Strategically headquartered in Dar es Salaam, Tanzania, the company specializes in the commercial cultivation of world-class avocados and the advanced extraction of premium crude avocado oil for global industrial, cosmetic, and pharmaceutical markets.

Unlike traditional processors that rely entirely on fragmented out-grower networks, Primeavo commands complete control over its supply chain. By managing its own extensive agricultural estates in the fertile highlands of Njombe alongside modern processing facilities, Primeavo guarantees unmatched quality, absolute structural traceability, and a reliable year-round production volume of 100% Tanzanian-grown Hass and Fuerte avocado oils.

VISION, MISSION, CORE VALUES

Our Mission

To engineer a world-class agricultural ecosystem that maximizes the value of Tanzania's natural bounty, delivering superior-quality crude avocado oil to international markets through advanced sustainable processing while empowering local farming communities.

Our Vision

To establish definitive global leadership as East Africa's most trusted, fully integrated supplier of premium avocado products, recognized worldwide for quality excellence, supply chain integrity, and ecological stewardship.

CORE VALUES

Quality Excellence (Farm-to-Factory):

We enforce rigorous quality standards at every single touchpoint—from managing the soil chemistry in our Njombe fields to supervising the pressure parameters during oil extraction.

Complete Supply Chain Integrity:

By owning our farms, we eliminate middle-tier supply variables. We provide buyers with bulletproof batch traceability and total transparency.

Agricultural Sustainability:

We employ forward-thinking farming methodologies that conserve water, build rich soil biology, and minimize chemical dependency to preserve Tanzanian land for generations.

Community Integration:

Our operations act as socio-economic anchors in the Njombe region, generating sustainable rural employment, driving technical skills transfer, and upgrading regional agricultural infrastructure.

THE PRIMEAVO AGRICULTURAL ADVANTAGE

Our agricultural foundation is rooted in Njombe, Tanzania, an area widely celebrated as one of the most geographically perfect environments on earth for high-yield avocado cultivation.

Optimal Microclimate:

The high altitudes, perfectly balanced rainfall patterns, and deep, well-drained volcanic soils of Njombe allow our Hass and Fuerte cultivars to achieve peak oil content and ideal fatty acid profiles.

True Traceability:

Because Primeavo owns and operates its own commercial farms, we are not vulnerable to the inconsistent sorting, varying harvest dates, or chemical exposures typical of unmonitored third-party out-grower groups.

Hass & Fuerte Specialization:

We strategically cultivate both varieties to optimize harvest windows, resulting in a resilient, continuous operational cycle for our processing plant.

CORE PRODUCT: INDUSTRIAL CRUDE AVOCADO OIL

Primeavo produces high-stability, nutrient-dense crude avocado oil extracted via state-of-the-art industrial processing methods. The oil preserves the natural characteristics of the fruit, making it a highly sought-after raw material globally.

Parameter / Specification	Details
Product Type	Premium Bulk Crude Avocado Oil
Source Cultivars	100% Tanzania-Grown Hass and Fuerte Avocados
Origin	Primeavo Owned Estates, Njombe, Tanzania
Extraction Method	High-efficiency industrial mechanical extraction
Product Appearance	Rich, characteristic natural green-hued liquid
Refinement Readiness	Highly optimized for further filtration and refinement by international buyers

PACKAGING & SHIPPING SPECIFICATIONS

Packaging Info

Consignment Strategy: Distributed exclusively through high-capacity 24-tonne liquid flexi-tanks.

Containment Integrity: Enclosed in certified, food-grade flexible bladders designed for bulk industrial fluid transit.

Thermal Management: Environmental conditions are strictly monitored throughout transit to guarantee oil stability and maintain chemical properties.

Intermodal Freight Setup: Consignments are built natively into 20-foot sea-freight containers pre-fitted with specialized fluid-retention frameworks.

Volume Allocation Per Unit

24 Metric Tonnes (Volume Capacity: 24 cbm)

Inside Fitting

Walls and floor to be fully covered by corrugated carton.

Fitted by COA certificated company.

Antibulging system minimum 2 bars per side.

Container Requirements

Less than 3 years old.

Homologated to load 25/30 tons.

Without rust nor weldings.

Doors must have two closing points.

Clean and odourless.

Walls completely corrugated.

Valve Key Architecture

Ball valve Snaplock 3 inch.

Valve in one piece.

Compress woven and film together.

Double system closing.

Safety locking of the valve.

Sealing in the handling.

Flexi-Tank Composition

Inner surface: PE Multilayered (1-3 layers).

Outer surface: Polypropylene with a maximum capacity of 24 cbm per unit.

Sustainability: Fully recyclable.

To safeguard product integrity over long distances and prevent oxidative degradation, Primeavo implements standard global bulk liquid logistics protocols:

Shipping Method: Handled exclusively via high-volume Flexi-Tank systems tailored cleanly within standard 20ft ocean freight containers.

Traceability Markers: Every exported flexi-tank is clearly coded with specific batch identifiers linking the final oil directly back to its designated harvest zone in Njombe.

Contamination Safeguards: We enforce structural multi-point inspections on all containers to ensure they are clean, completely rust-free, structurally uncompromised, and lined meticulously with multi-layered protective cardboard barriers prior to loading.

SUSTAINABILITY & ZERO-WASTE GOALS

Primeavo operates under an eco-friendly Processing framework designed to maximize resource efficiency:

Bio-Waste Repurposing: We are actively developing secondary frameworks to repurpose residual avocado skins and nutrient-dense seeds (pastes) into organic fertilizers and biomass fuels to power our facilities.

Chemical-Free Processing: Our extraction lines rely purely on mechanical processes, completely omitting harsh chemical solvents to keep our products natural and our liquid discharge environmentally safe.
